HOW IT WORKS

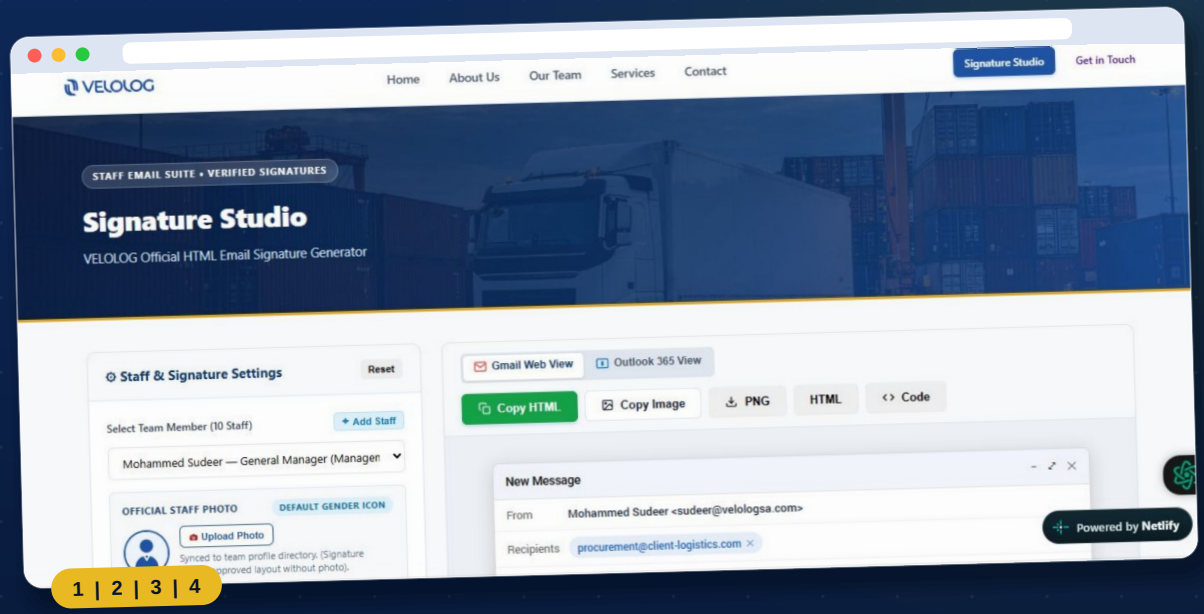

Four steps to a perfect signature.

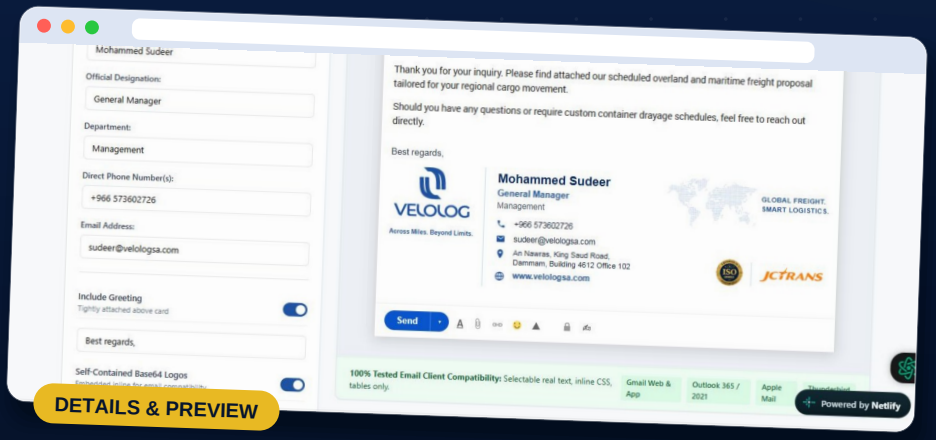

1 — Select team member
Pick any of the 10 staff from the dropdown, or add someone new with the + Add Staff button.

2 — Edit the details
Update name, official designation, department, direct phone number(s) and email address. Reset sits at the top of the settings panel.

3 — Preview it
Switch between Gmail Web View and Outlook 365 View. The optional greeting, such as "Best regards,", sits tightly above the card.

4 — Copy or export
Use Copy HTML or Copy Image, or export as PNG, HTML or Code.

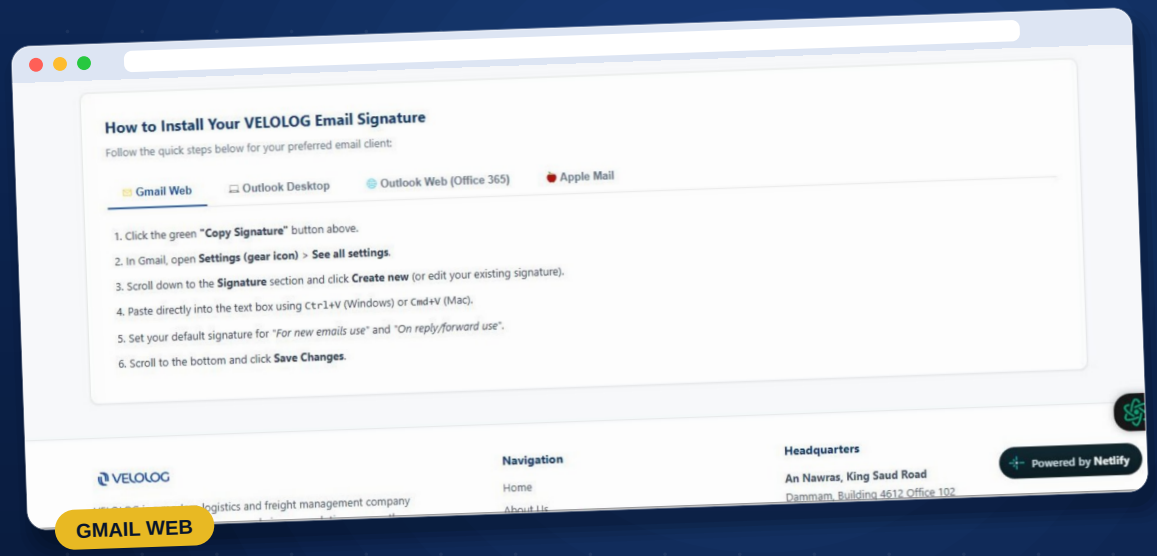

GOOD TO KNOW
Staff photos show on the public Team page only and never appear inside email signatures.

INSTALL GUIDE | GMAIL WEB

Install your signature.

1. Click the green copy button above the preview.
2. In Gmail open Settings (gear icon) > See all settings.
3. Scroll down to the Signature section and click Create new, or edit your existing signature.
4. Paste into the text box with Ctrl+V (Windows) or Cmd+V (Mac).
5. Set it as default for "For new emails use" and "On reply/forward use".
6. Scroll to the bottom and click Save Changes.
